

Android App to Enhance Retail (Convenience Store) Operations

AT A GLANCE

COMPANY- Scanning Solutions in Houston, Texas

INDUSTRY- Retail/Convenience Store

SOLUTION- Mobile Application to enhance Retail Operations.

“We understand the Retail environment of convenience stores and the operations challenges. Our existing software solutions needed to be extended to mobile devices, and we teamed up with Unvired to leverage their Mobile Platform. We are very happy with the mobile applications that Unvired has delivered, and believe that this will help differentiate our solutions.”

Dinesh Hospeti,
Chief Product Officer, Scanning Solutions

ABOUT SCANNING SOLUTIONS

Scanning Solutions is a Houston based company that provides an affordable, functional and easy to use product for the convenience store industry.

BUSINESS CHALLENGES:

- Paper-based Convenience Store processes
- Need to better Manage Inventory & Price Changes
- Need to track Lottery books and sales

SOLUTION:

- Mobile App - Accept Deliveries, does Inventory (Cycle) Counting, enables Price Changes
- Integration between mobile app and backend system via Unvired Digital Enterprise Platform
- Barcode Scanning
- Works Offline
- Solution deployed on Microsoft Azure
- Mobile Devices: Android Tablets

PROJECTED BENEFITS:

- Enhanced Convenience Store Operations
- More Accurate Inventory Management
- Increased Data Integrity between systems
- Enable better Decision Making for Store Owners
- Decrease Loss (theft) in Lottery business
