SOLUTION- Patient Engagement Mobile App for Patients and Care Coordination Portal for Healthcare Providers

ABOUT UNVIRED

Unvired delivers solutions to enable the Digital Enterprise. Unvired mobilizes SAP, Oracle, and other backend systems, enabling greater employee productivity and customer satisfaction.

Headquartered in Houston, TX and with customers in N. America, Europe, South Africa, and APAC, Unvired is committed to its clients realize the benefits of enterprise mobility at a disruptively low cost and time to implement, and continues to innovate in enterprise mobility.

Issues the remindtrac's Tools Address:

- Remote monitoring of patients in between office visits is difficult
- Patients do not take their medications on time
- Lack of Medication adherence costs Billions of dollars
- Need for a Solution to enable providers to engage with patients and impact behavior

Unvired assists software development of remindtrac's proprietary platform to:

- Enable interaction between Mobile app and a Care Coordination Platform
- Create Care Dashboard, Reminders/Alerts, Medication Schedule, Messages, Assessments, Medical team, and Diary
- Integrate a blue tooth device with app, including off line capabilities
- Develop Hybrid Mobile app (HTML/JavaScript) leveraging the Ionic Framework using Apache Cordova plug-in
- Develop for Mobile Devices: Android and iOS

Benefits include:

- Healthcare professionals can connect to their patients in real time to monitor and track key aspects of behavioral healthcare management and medication adherence.
- Patients become engaged, active, responsible participants, by tracking and recording their medication adherence.
- Healthcare professionals can further engage their patients with mobile self-administered screening and assessment tools between clinic visits.
- Using data points and interactive tools within the system, clients can evaluate and review adherence scores per medication, and generate reports.

About remindTrac:

remindTrac is a fully integrated care platform to improve patient health through medication adherence and real time behavioral engagement.
