

## AT A GLANCE

**COMPANY-** Mid-stream company  
Calgary, Canada

**INDUSTRY-** Oil and Gas

**SOLUTION-** Digital Work Permits  
App with Workflow automation  
using Unvired Turbo Apps.

**Mobile Devices:** Android, iPads,  
and iPhones.

## ABOUT UNVIREd

Unvired Enables Digital Transformation resulting in Enhanced Competitive Advantage for Enterprises both large and small globally.

## BUSINESS CHALLENGES:

- **Inefficient work processes** – manual data entry.
- Enable digital workflow for quick authorizations.
- Lack of data validation & consistency in data capture
- Lack of real-time data & insights

## SOLUTION:

### Converted paper-based Work Permit Forms and enabled Digital Workflow using Turbo Apps:

- Supervisors share the form with the external contractors using the Turbo Apps portal.
- External contractors fill out Work Permits on mobile and send them to Permit Issuer (Supervisors) for review and signature.
- Once the Permit Issuer signs the permit, the permit is sent back to the receiver (external contractors).
- After work is done, the Permit Receiver signs the permit to notify the Issuer that the work is completed.
- **Permit Closure:** The permit issuer signs the permit. A notification is sent to the receiver that the permit is now closed.
- **Dynamic forms-** hide or show forms based on risk level
- Hot Work, Cold Work, Confined Space & more.
- Attach documents/pictures & Electronic Signatures

## BENEFITS:

- **Reduction of paperwork:** Eliminates the need to store a bunch of paper permits.
- **Better Reporting:** Using the app allows to set up reporting to track the information and statistics in real-time.
- **Increased Productivity:** Permits can be sent to contractors before they get to the site. That allows them to be prepared for the work when they arrive and can go straight to completing their hazard assessments/toolbox meetings and starting work.
- Decreased errors, Greater Safety, Better Compliance
- More Efficient Permitting process
- Maintenance/Repairs completed quicker
- More efficient audits
- Contactless Interaction
