

## AT A GLANCE

**COMPANY-** A Large Drilling Company

**INDUSTRY-** Oil and Gas

**SOLUTION-** Unvired Rig Asset Mover app for SAP to streamline equipment transfer processes between rigs for enhanced visibility.

## ABOUT UNVIRED:

Unvired Enables Digital Transformation resulting in Enhanced Competitive Advantage for Enterprises both large and small globally.

## Customer Scenarios:

- No hierarchical view of equipment and related equipment, which can make it difficult to determine which equipment is related during dismantling and installation.
- Inability to dismantle multiple pieces of equipment in a single step, leading to inefficiencies in the transfer process.
- No real-time visibility of equipment transfers, which can result in delays and potential losses.
- Inability to transfer equipment managed outside of SAP, making it challenging to track and manage all equipment transfers.  
The need to reduce the usage of paper in the transfer process, which can be time-consuming and wasteful.
- Can't create transfer requests in areas with no connectivity.

## Highlights:

### Manage intercontinental equipment transfers between Rigs with real-time visibility:

- Graphical view of the equipment structure in the Functional Location hierarchy highlighting related equipment for easy identification
- Dismantling the entire hierarchy of related equipment in a single step
- Transfer equipment both managed within SAP and outside of SAP in a single transfer request
- Distribution of equipment Bill of Lading as pdf documents via email and images as MMS to all stakeholders
- Signature capture of drivers, equipment managers and other stakeholders at various points in transit
- Integrates with Microsoft SharePoint.

## Business Benefits:

- Efficient transfer of equipment with real-time visibility
- Mobile app for offline usage enabling 24/7 availability
- Complete traceability with auditable records
